

# TruTrak Pro GAT23 4G GPS Tracker

**Congratulations** on your purchase of the

## GAT23 4G GPS Tracker

### Tracking Device

#### Step 01

Your TruTrak GAT23 GPS Tracker has arrived. First you need to charge the tracker fully, using the charging cable supplied. We recommend leaving it on charge for 4 hours.

Once you have fully charged your tracker take a short walk or drive so that the tracker starts to send us data which we can verify.

[activate.trutrakpro.com](https://activate.trutrakpro.com)

#### Step 02

Scan the "Activate now" QR Code above and follow the instructions:

#### Step 03

Scan here to get the App from the App store

#### Step 04

Scan here to get the App from the Play Store

[topup.trutrakpro.com](https://topup.trutrakpro.com)

#### Step 05

Scan here to top up when the time comes. You have 14 days of free usage from when the device is turned on.

Once your tracker is activated you can now choose a location to place your tracker. Remember the tracker has strong magnets so it can be attached to any metal surface you require.

Note: The Tracker is IP65 rated which means it will protect against water splashing and dust particles but be aware it is not recommended to place the tracker in an area where it will be submerged constantly by water like under a vehicle.

UK Office hours 0900-1700 [techteam@trutrak.co.uk](mailto:techteam@trutrak.co.uk) +44 1206 482524 TruTrak Ltd Unit 7  
Dencora House, 34 White House Road. Ipswich IP1 5LT.

**Support is also available in the App. Select the main menu and choose support and you can then select a contact method.**
